

My son, and I have been fighting for years to have California allowed to be a sanctuary state. When the federal government is in power and our state is being taken over by the big corporations, we are not afraid to stand up and fight for our rights. To stand up to those who are suppressing our rights is what we should be fighting for.

I want to ask you to know that there are a few things that I am concerned about that are important to me.

First, there is the issue of climate change.

The U.S. government is responsible for the loss of thousands of acres of forest every year. These are the people that are most affected by the burning of forest land. Our land is being burned because we are not paying the price for the loss of these people. This is a fundamental issue that we must be concerned about.

If the federal government continues to ignore the fact that there are millions of people who are living in a state that is not fully in conclusive about their rights, then the loss of these people will continue.

Second, we have to protect the environment. These are our natural surroundings, as well as the natural resources that are being taken away from us. These are the people that are most affected by the burning of these natural resources. I see that these people are suffering the consequences of the climate crisis.

Third, and most importantly, we must protect our children from our toxic waste.

We need to protect our children from the harm we are causing to our natural environment.

Let me begin with the children.

My son, my daughter, and I are in great danger of losing our natural environment.

I have been in public school for years. I am concerned about the quality of

education that we receive at our public schools. We are not only under threat, we are also suffering from the lack of health care.

These are the children that are most at risk of being sent to a high-risk high school.

I understand that the kids are suffering as they are being exposed to the dangers of the climate crisis. But I do not want to be in the schools in which these children are being exposed.

I want to have a chance to educate these kids.

I want to
